Final Security Report

Low|Medium|High|Critical **string** (Target: IP or username)
Reason: short explanation
Action: recommended mitigation

Low|Medium|High|Critical **string** (Target: IP or username)
Reason: short explanation
Action: recommended mitigation

Low|Medium|High|Critical **string** (Target: IP or username)
Reason: short explanation
Action: recommended mitigation

Low|Medium|High|Critical **string** (Target: IP or username)
Reason: short explanation
Action: recommended mitigation

Low|Medium|High|Critical **string** (Target: IP or username)
Reason: short explanation

Action: recommended mitigation

Low|Medium|High|Critical **string** (Target: IP or username)
Reason: short explanation
Action: recommended mitigation

Low|Medium|High|Critical **string** (Target: IP or username)
Reason: short explanation
Action: recommended mitigation

Low|Medium|High|Critical **string** (Target: IP or username)
Reason: short explanation
Action: recommended mitigation

Low|Medium|High|Critical **string** (Target: IP or username)
Reason: short explanation
Action: recommended mitigation

Low|Medium|High|Critical **string** (Target: IP or username)
Reason: short explanation
Action: recommended mitigation

Low|Medium|High|Critical **string** (Target: IP or username)
Reason: short explanation
Action: recommended mitigation

Low|Medium|High|Critical **string** (Target: IP or username)
Reason: short explanation
Action: recommended mitigation

Low|Medium|High|Critical **string** (Target: IP or username)
Reason: short explanation
Action: recommended mitigation

Low|Medium|High|Critical **string** (Target: IP or username)
Reason: short explanation
Action: recommended mitigation

Low|Medium|High|Critical **string** (Target: IP or username)
Reason: short explanation
Action: recommended mitigation

Low|Medium|High|Critical **string** (Target: IP or username)
Reason: short explanation
Action: recommended mitigation

Low|Medium|High|Critical **string** (Target: IP or username)
Reason: short explanation
Action: recommended mitigation

Low|Medium|High|Critical **string** (Target: IP or username)
Reason: short explanation

Action: recommended mitigation

Low|Medium|High|Critical **string** (Target: IP or username)
Reason: short explanation
Action: recommended mitigation

Low|Medium|High|Critical **string** (Target: IP or username)
Reason: short explanation
Action: recommended mitigation

High **brute-force** (Target: 198.51.100.90)
Reason: IP 198.51.100.90 is a known brute-force target
Action: Block IP 198.51.100.90

Low|Medium|High|Critical **string** (Target: IP or username)
Reason: short explanation
Action: recommended mitigation

Low|Medium|High|Critical **string** (Target: IP or username)
Reason: short explanation
Action: recommended mitigation

Low|Medium|High|Critical **string** (Target: IP or username)
Reason: short explanation
Action: recommended mitigation

Low|Medium|High|Critical **string** (Target: IP or username)
Reason: short explanation
Action: recommended mitigation

Low|Medium|High|Critical **string** (Target: IP or username)
Reason: short explanation
Action: recommended mitigation

Low|Medium|High|Critical **string** (Target: IP or username)
Reason: short explanation
Action: recommended mitigation

Low|Medium|High|Critical **string** (Target: IP or username)
Reason: short explanation
Action: recommended mitigation

Low|Medium|High|Critical **string** (Target: IP or username)
Reason: short explanation
Action: recommended mitigation

Low|Medium|High|Critical **string** (Target: IP or username)
Reason: short explanation

Action: recommended mitigation

Low|Medium|High|Critical **string** (Target: IP or username)
Reason: short explanation
Action: recommended mitigation

High **brute-force** (Target: 198.51.100.90)
Reason: Repeated requests to same endpoint
Action: Implement rate limiting

High **brute-force** (Target: 198.51.100.99)
Reason: Repeated login attempts with invalid credentials
Action: Implement rate limiting and verify user credentials

High **brute-force** (Target: 198.51.100.98)
Reason: IP address 198.51.100.98 is a known brute-force target
Action: Implement rate limiting and consider IP blocking

Low|Medium|High|Critical **string** (Target: IP or username)
Reason: short explanation
Action: recommended mitigation

Low|Medium|High|Critical **string** (Target: IP or username)
Reason: short explanation
Action: recommended mitigation

Low|Medium|High|Critical **string** (Target: IP or username)
Reason: short explanation
Action: recommended mitigation

Low|Medium|High|Critical **string** (Target: IP or username)
Reason: short explanation
Action: recommended mitigation

Low|Medium|High|Critical **string** (Target: IP or username)
Reason: short explanation
Action: recommended mitigation

Low|Medium|High|Critical **string** (Target: IP or username)
Reason: short explanation
Action: recommended mitigation

Low|Medium|High|Critical **string** (Target: IP or username)
Reason: short explanation
Action: recommended mitigation

Low|Medium|High|Critical **string** (Target: IP or username)
Reason: short explanation

Action: recommended mitigation

High **brute-force** (Target: 198.51.100.96)
Reason: Repeated login attempts
Action: Implement rate limiting

Low|Medium|High|Critical **string** (Target: IP or username)
Reason: short explanation
Action: recommended mitigation

High **brute-force** (Target: 198.51.100.88)
Reason: IP address 198.51.100.88 is a known brute-force target
Action: Implement rate limiting and account lockout
